RE: AMP Comments Regarding EMEA's Guidance on Definitions for Genomic Biomarkers, Pharmacogenomics, Pharmacogenetics, Genomic Data and Sample Coding Categories (EMEA/CHMP/437986/2006)

AMP is an international not-for-profit professional association representing over 1,500 physicians, doctoral scientists, and medical technologists who perform molecular diagnostic testing based on nucleic acid technology. AMP members practice their specialty in widely diverse settings: academic medical centers, independent medical laboratories, community hospitals, federal and state health laboratories, and the in vitro diagnostic industry. In this capacity, AMP members are involved in every aspect of molecular diagnostic testing: administration and interpretation of molecular diagnostic tests, research and development, and education. As the only professional association dedicated solely to molecular pathology, AMP provides national leadership for the advancement of safe and effective practice and education for molecular diagnostic testing in the health care industry.

We have reviewed and agreed with the definitions for genomic biomarkers, pharmacogenomics, pharmacogenetics, genomic data and sample coding categories.

Thank you for the opportunity to comment on this very important document. Please do not hesitate to contact me at victoria.m.pratt@questdiagnostics.com if we can be of further assistance.

Sincerely,

A handwritten signature in blue ink, appearing to be 'V.M. Pratt', is written over a light-colored rectangular background. The signature is fluid and cursive, with a large loop at the top and a horizontal line extending to the right.

V.M. Pratt, PhD
Clinical Practice Committee Chair
